External reviewers JMATE Volume 1, 2008

The JMATE Editorial Board would like to extend their gratitude and heartfelt thank-you to all the external reviewers that provided timely reviews of the manuscripts submitted for issue 1. These reviews were invaluable, ensuring that the quality of the journal was maintained at the optimum and that the authors work which emerged in this volume was the best it could be. It is our feeling that the value of 'peer review' is to ensure that the papers are as thoroughly written and clear as can be, by providing the authors a new pair of eyes so to speak. The external review component also adds insight by the fact that these reviewers are experts in the field of focus for that paper and their comments and suggests serve only to increase the value of the contribution.

As the Editor-in-Chief, I would also like to thank my Managing Editor, Mike Belanger for the extensive and careful review of each and every manuscript that has crossed our desk and proofing each galley before its release.

External Reviewers

Bonde, Robert	United States Geological Survey - Florida Caribbean Science Center, USA
Darling, Jim	Whale Trust, USA
Gibbs, Sue	Maquarie University, Australia
Goold, John	University of Wales Bangor, UK
Parsons, Chris	George Mason University, USA
Simmonds, Mark	Whale & Dolphin Conservation Society, UK

Also all the others whom we contacted and who have agreed to review should a manuscript come along in their area of expertise.
